SKILLS

- **Languages:** JavaScript, C, C++, Python
- **Technologies:** HTML, CSS
- **Databases/Tools:** MySQL, MongoDB, Git, GitHub, Figma
- **Soft Skills:** Critical thinking, Creativity, Patience, Self-motivation, Teamwork

PROJECTS

Sun Tracking Solar Pannel | GitHub

Dec 2025 - Jan 2026

- To design and develop a solar panel system that automatically tracks the position of the sun and to maximize the amount of sunlight received by the solar panel throughout the day.
- To improve solar energy generation compared with a fixed solar panel. To understand the practical application of sensors, motors, and control systems in renewable energy
- Designed and developed a sun-tracking mechanism for the solar panel using light sensors (LDRs) to detect the direction of maximum sunlight.
- Successfully developed a working sun-tracking solar panel prototype. The panel automatically adjusted its position according to the direction of sunlight.
- **Tech Stack:** IDE, C++, Arduino UNO, LDR

Online Quiz Application | GitHub

Sep 2025 - Oct 2025

- To develop an interactive online platform for conducting quizzes digitally by providing users with a simple and user-friendly interface for attempting quizzes.
- To automate quiz evaluation and generate results instantly without the need for manual evaluation of quiz responses.
- Designed and developed the user interface for the quiz application and implemented multiple-choice questions with selectable answers.
- Successfully developed a functional Online Quiz Application capable of conducting quizzes and generating results instantly.
- **Tech Stack:** HTML, CSS, JavaScript + PHP/MySQL or Python

Real-Time Color Detection & Sorting System | GitHub

Feb 2025 - Mar 2025

- Spearheaded the development of a real-time collaborative editor enabling more than 2 users to edit the same document online simultaneously without data conflicts.
- Designed and developed an Arduino-based automated color sorting system using TCS3200 sensor and servo motors. +.
- Implemented real-time RGB frequency detection and calibration to improve multi-color classification accuracy+.
- Achieved 92% sorting accuracy, reduced misclassification by 30%, and enabled <1 object detection & sorting
- **Tech Stack:** Arduino, TCS3200 Sensor, Servo Motor, Embedded C/C++

TRAINING

Lovely Professional University | Certificate

Jan 2026 - Jul 2026

C Programming

- Develop a strong foundation in C programming, including syntax, variables, data types, operators, control statements, functions, arrays, pointers, and structures.
- Build problem-solving and logical-thinking skills by applying C programming concepts to solve computational problems.
- Practiced debugging, testing, and optimizing C programs while completing programming assignments and laboratory exercises.
- Successfully completed the C Programming course at Lovely Professional University (LPU) and obtained a certification.

CERTIFICATES

- CS105: Introduction to Python | [Saylor.Org](https://www.saylor.org/books/saylor-org/books/CS105/) Feb 2026
- CS302: Software Engineering | [Saylor.Org](https://www.saylor.org/books/saylor-org/books/CS302/) Feb 2026
- Big Data and Data Science | [Infosys](https://www.infosys.com/) Mar 2026

ACHIEVEMENTS

- Successfully completed C Programming certification, strengthening programming fundamentals and logical thinking
- Developed practical projects including an Online Quiz Application and Sun-Tracking Solar Panel.
- Built a strong foundation in programming, problem-solving, and core CSE concepts through academic coursework, practical assignments, and project-based learning.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.11** Aug 2025 - Present
- **S.T Xavier's Intermediate College** Ranchi, Jharkhand
Higher Secondary Education; **Percentage: 69.1%** May 2022 - Mar 2024
- **S.T Mary's Higher Secondary School** Cooch Behar, West Bengal
Secondary Education; **Percentage: 79.7** Jun 2021 - Mar 2022
